THE WAY OF THE SOUTH

by
HOWARD ODUM

To a certain extent this book is a popularization of previous works of Dr. Odum's on regionalism and race, with an admixture of history and poetry. The questions he raises about the South are: How did it get that way, and whither should it be going? While his answers are not always clear, they are profuse and suggestive. His plea is for a better balance among the great regions of a great nation, and he couples with it a constructive program which any American would do well to read. (Published by Macmillan, 1947. 350p. 280.002 Od8W)

HIGHER SURVEYING

by
C. B. BREED and G. L. HOSMER

This is the sixth edition of Volume II of The Principles and Practice of Surveying. Extensive revisions have been made in this edition. The chapter on Triangulation has been largely rewritten to conform to current practice and recent developments in Geodetic Surveying have been included. Photogrammetric Surveying has been entirely rewritten to include recent developments. The chapter on Ground Photogrammetry has been condensed and that on Aerial Photogrammetry has been much expanded to include a more complete treatment of methods and instruments used for compiling maps from aerial photographs. The theory and practice of Stereo-Photogrammetry have been assembled in one chapter. Sections on Stream Gaging and Map Projections have been revised to meet present requirements. NOTES TO OUR PATRONS--PLEASE READ THEM!

PERIODICAL CIRCULATION

We ask that you keep a current periodical not more than three days. Many people wish to see most of the periodicals we take. For example, 215 people see Agricultural Engineering. Of course we have several copies. But each person must cooperate and keep the periodicals moving--or they are too old by the time they reach the last man on the list.

Do you like to receive a magazine three or four months late? No one does.

For the past month, we have checked all the routing slips on returning periodicals. We can praise most of you for your splendid cooperation in forwarding magazines promptly. However, there are some people who persistently keep them too long. Do you deserve our praise, or are you one who keeps periodicals!

Will you please check and see that periodicals are mailed out within the three day time limit? Thank you.

RESERVE LISTS FOR BOOKS

We wish to remind you again that the library cannot own enough copies of a book to supply the demand just after a book has been listed in the Library Newsletter. Consequently, we have to maintain reserve lists and send the books to you as we reach your names on the lists.

If you need to read a book for a definite purpose by a definite time (one you see listed in the Newsletter) and tell us so, we shall endeavor to get the book to you before that time. Otherwise, we must assume that the book will be helpful and of interest whenever we can get it to you.

Knowing that for any book listed in the Newsletter within the last two or three months there is apt to be a waiting list, won't you please endeavor to get the books back to the library as soon as possible--so others can read them?

USING THE LIBRARY

Form AD-245. Please secure these forms from your regular supply center and use them in making requests for library material. You need not make them in duplicate.

Date Due Slips. Please leave the slips on which the date due is stamped attached to the books when you return them. These slips are clipped to the fly-leaf of a book and to the cover of a pamphlet. Watch the date due and return books on time.

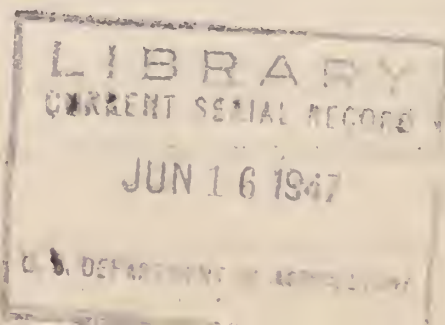

Penalty Indicia. Requests for library service may be mailed under frank. Books and publications weighing under four pounds may be mailed under frank.

Returning Books. Please wrap books in cardboard or other heavy paper to prevent injury to the covers.

Change of Address and Deletion of Names from Periodical Circulation. When you indicate such changes on the routing slips on the periodicals, we cannot know of the change until the periodicals return to the library--which may be weeks or months. In the meantime, we may have sent the next issue of that magazine to you. It would be better if you would mail notice of such changes direct to us--an informal note would be sufficient.
